ABOUT ME

In my final year of studies as Software Engineer at Technological Educational Institute of Central Macedonia. Excited about software development, web development, game development and generally development technologies. Also, really interested in taking new opportunities and work as a team member. I'm looking forward to start my career and enrich my development skills.

**I'm looking forward to do my intern in order to complete my bachelor's degree studies.

EDUCATION AND TRAINING

09/2018 – CURRENT – Serres, Greece

Computer Programming, Specific Applications

Technological Educational Institute of Central Macedonia

DIGITAL SKILLS

Java / PHP / HTML / CSS / MySQL / Git / Docker

PROJECTS

04/2022 – 05/2022

Leave Managment System

<https://github.com/krakenhacker/leave-managment-system>

Application developed and designed to manage the employee's leaving request for a company.

Using PHP, MySQL, Bootstrap

11/2021 – 01/2022

Back-End Development for a Music app on Android

<https://gitlab.com/brunos2021/rest>

Using Java Spring boot framework. Tested about 60%. (Attempt for Mock Tests)

Features: Get artists information from AudioDB API.

There is a readme file with all the rest services application provides.

#You can run the service with docker (cmd# 'docker run -p 8080:8080 -t brunos2021/rest-service')

#After running the container just type 'localhost:8080/artists/api/{name}' in your browser (as {name} put your favorite artist. exp: localhost:8080/artists/api/beyonce

03/2021 – 05/2021

My ever first project, Web application for photoalbums

<https://github.com/krakenhacker/PhotoAlbum>

Using Java Servlets, HTML, CSS, MySQL, Google Maps API
